Assembly:

Part Diagram can be found on the website listed above with part names.

Step 1: Assemble the Screen Holder to Screen backer to match the photo above using 2 of the screws with 2 washers.

Step 2: Attach the Radenso Holder to the Screen Holder using 2 more screws with washers. You can screw in the screws from the top access holes on the Radenso holder. The already assembled clip should be facing forward towards the Screen Backer.

Step 3: Install on your Tesla Screen. Prior to installation use the Alcohol pad to clean the back of the screen.

We are not affiliated with or endorsed by Radenso. This product is a 3D Printed, custom designed accessory. Huge thanks to Radenso for providing us a demo unit to create this Radar holder.
